What Dis Booky For

Dis booky wanna be da one togethery reference for da tribe, by setting a teeny-minimum set of rules for Kanban. It build on da Kanban basics to hold up da whole big rainbow of banana-giving and big-boss headache.

In dis doccy, “Kanban” mean da whole bundle of ideas writted here.

What Is Kanban, Den?

Kanban is a planny for making da banana zoom-zoom betta through a process, using a looky, pully system. Banana can mean lotsa things (like what da customer need, what da user need, what da company need, what da big blue planet need).

Kanban got tree big do-dos:

- Makey and looky da worky-flow
- Manage da worky bits in da worky-flow, all da time
- Fix-fix da worky-flow

Dese do-dos togethery make a **Kanban system**, and da peeps who join in is **Kanban system peeps**.

Why Use Kanban?

Kanban look hard at **zoom-zoom** — da maybe-banana moving through a system. It wanna make **giv-da-right-stuff**, **no-wastey** and **no-surprisey** as good as dey can be:

- **Giv da right stuff**: Giv customers what dey want, when dey want it.
- **No wastey**: Use da monies and minion-power da best way.
- **No surprisey**: Can guessy da banana-giving close enough, even with da wobbly unknowns.

Kanban poke da fix-fix along by making peeps ask betta questions earlier-earlier. It fit almost any worky-flow and almost any job-kind.

Kanban Brainy-Think

Kanban build on old-and-goody brainy-think:

- Systems thinky-think
- Lean rules
- Queue brainy-think (like how big da batchy, how long da liney)
- Wobbly-wobbly and quality checky-check

Kanban can holdy-hand with other banana-giving ways and methody-methods.

Da Kanban Do-Dos

See Da Work: Makey and Looky Da Worky-Flow

Da shared understandy of zoom-zoom is called da **Definitiony of Worky-Flow (DoW)**. It must-must got:

- Say-so for what da worky bits is
- Say-so for started and finished
- Da states from started to finished (WIP)
- How da WIP get bossed
- Out-loud zoom-zoom policies
- Promisa of Tim (SLE)

Da **Kanban boardy** is da looky-version of da DoW. Dere is no bossy rules for how it look — see-through is da whole point.

Manage Da Work: Bossing Da Worky Bits

Dis got do-dos like:

- Bossing da WIP
- No letting bits pile-pile up
- Stopping bits from getting oldy-oldy for no reason
- Unstucky da stucked work

Regular luks (but no must be formal) is cheered on.

Bossing Da Work In Progresso WIP must-must be bossed out-loud, often with **WIP Limits** (numbers or tokens). Dis make a **pully system** — bits get pulled only when dere is room.

Any exceptions must-must be writted out-loud in da DoW.

Promisa of Tim (SLE) SLE = chunk o' time + how-sure number (like, "85% of worky bits finish in 8 days").

Use oldy **cyclly time** to work it out, and looky-show it on da boardy. Use a guessy if yu got no data yet.

Fix Da Work: Making Da Worky-Flow Betta

Teams keep fixing da worky-flow to get a betta balance of giv-da-right-stuff, no-wastey and no-surprisey.

Fixes can be teeny-steppy or BIG, and should happen whenever needed — no only on a set beaty.

Kanban Measure-Bits

Da four teeny-minimum zoom-zoom measures:

- **WIP:** Work started but no finished
- **Throughputty:** Worky bits finished per chunk o' time
- **Worky Bit Oldy-ness:** Time since a bit started
- **Cyclly Time:** Time from started to finished

Looky-show dese measures with whatever charty-charts help. Teams may use extra local numbers too.

Last Blabla

Da Kanban do-dos and measure-bits is **no-can-change**. Half-doing it is no Kanban. Other techniques can be gluey'd on, but da minimum do-dos, da numbers, and da spirit of making banana big must-must stay.

Oldy Story of Kanban

Kanban come from da **Toyota Production System** and big-brain peeps like **Taiichi Ohno** and **W. Edwards Deming**. Da now-now brainy-worky Kanban got borned in 2006 at **Corbis** and growed up through world-wide work-togethery.

Big Thank-Yous

Tank yu to:

- Yuval Yeret & Steve Porter – da ground-floor ideas
- Emily Coleman – inspiration for what banana mean
- Ryan Ripley & Todd Miller – helper stuff
- Julia Wester, Colleen Johnson, Jose Casal, Jean-Paul Bayley – luky-overs
- Dave West & Eric Naiburg – printy-printy feedback
- Deborah Zanke – word-tidying
